RELEVANT EXPERIENCE

Front-End Developer @ Puffy

March 2021 - Present // Dubai, UAE

- > Collaborated with cross-functional teams to develop internal projects using technologies such as Liquid, JavaScript, React, and Shopify.
- > Implemented A/B testing strategies using Optimizely, resulting in a 20% increase in user engagement.
- > Wrote modern, performant, and robust code, improving page load times by 15%.
- > Mentored junior developers and conducted code reviews to ensure code quality.

Front-End Developer @ Bayzat

Feb - July 2020 // Dubai, UAE

- > Led the front-end development of a re-designed website using Gatsby (React), ensuring maintainable and scalable code.
- > Integrated GraphQL, Node.js, and Kotlin for seamless backend API communication.
- > Conducted comprehensive cross-browser testing, ensuring compatibility and responsiveness across devices.
- > Developed interactive website features using Framer Motion and GSAP, enhancing user experience.
- > Utilized Google Tag Manager for user interaction tracking and conducted A/B testing with Google Optimize, identifying and implementing UI/UX improvements.

Freelance Front-End Developer @ Freelance

Jul 2019 - Present // Dubai, UAE

- > Collaborated with agencies like JK58 and GTECH to deliver client websites using WordPress, and Gatsby.
- > Worked directly with designers and project manager at cygnus.co to deliver a modern website using WordPress, PHP, Three.js, and barba.js.

Front-End Developer @ TenTwenty

Oct 2016 - June 2019 // Dubai, UAE

- > Developed and maintained client websites using PHP, HTML, CSS, SASS, JavaScript, and jQuery
- > Worked with CMS platforms such as Concrete5, WordPress, and Magento to deliver customizable solutions.
- > Utilized modern front-end tools like Webpack and Rollup for efficient development workflows.
- > Collaborated with designers to create intuitive UI animations using GSAP and anime.js, enhancing the user experience.

SKILLS

Programming languages

JavaScript (ES6), TypeScript, HTML, CSS/SASS, GraphQL, PHP, Liquid

Libraries & Frameworks

React, Gatsby, Next.js, Node.js, Express, Nuxt.js, Apollo GraphQL, Redis

Tools & Platforms

Shopify, Git, Webpack, Rollup, Netlify, Heroku, WordPress, Firebase, Postgres

Design

Sketch, Figma, Invision, Zeplin

PROJECTS

Rabble academy [🔗](#)

Developed a web app using React, Redux, Node.js, Express, Passport.js, Apollo GraphQL, Postgres, and Redis, designed as an online learning platform.

Puffy [🔗](#)

Website built on Shopify using technologies such as Liquid, SASS, JavaScript and more.

Bayzat [🔗](#)

Created a website using Gatsby (React), featuring a headless CMS with GraphQL, state management with Context API, and dynamic animations with Framer Motion.

Cygnus [🔗](#)

Developed a WordPress-based website with modern JavaScript (ES6), SASS, GSAP, Three.js, and barba.js, enhancing user interactions and visual appeal.
